

I have complained to the local stations KNX and KFWB about their dismal coverage of traffic conditions. They have had years to improve their traffic service but have done nothing. I find the traffic problem before they report it if at all. They cover a few spots then you wait 10 minutes until they MIGHT cover your route.

The purpose of traffic reports is not to tell us how miserable we are but to give us enough information to plan for earlier departures or even different routes both for our own peace of mind but to not add to the problem.

XM radio has ACTULLY helped me avoid traffic problems and made my trip to and from work less stressful.

Thank you for your time. Richard A Montgomery
